Open Access at Oxford University Press

Open Access Publications

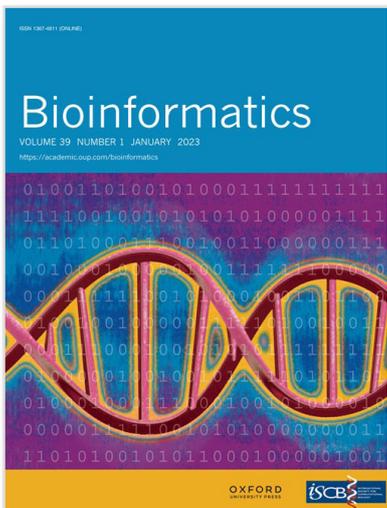

Open Access at Oxford University Press

Oxford University Press (OUP) is the largest university press publisher of open access (OA) research. We embrace open access to further our mission to facilitate the widest possible dissemination of high-quality research worldwide.

We publish a growing range of fully open access journals and more than 150 open access monographs. We have published over 100,000 open access papers across all major subject areas since 2004.

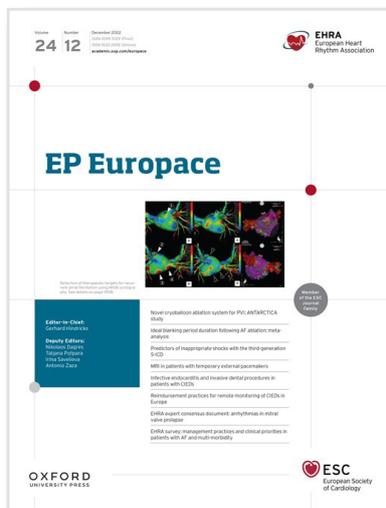

Open Access Journal Highlights

High quality scientific papers on new developments in genome bioinformatics and computational biology.

Impact Factor: 6.931*
SCIE Mathematical & Computational Biology: 5/57

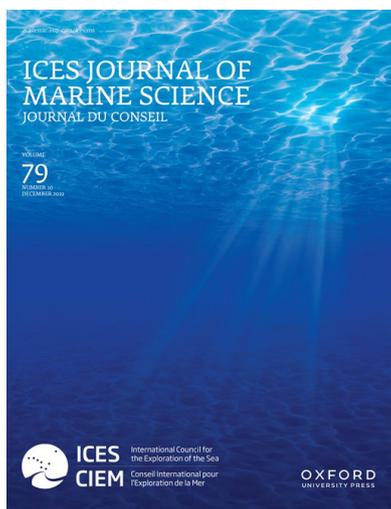

Research from leading authors, covering all aspects of Arrhythmias and Sudden Death.

Impact Factor: 5.486*
SCIE Cardiac & Cardiovascular Systems: 46/143

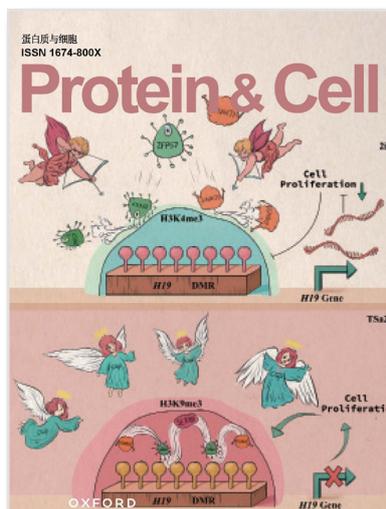

Publishes cutting-edge new research in all areas of Evolutionary Biology.

Impact Factor: 6.494*
SCIE Evolutionary Biology: 8/51

Advancing our scientific understanding of marine systems and the impact of human activities on them.

Impact Factor: 3.900*
SCIE Marine & Freshwater Biology: 13/113

Protein & Cell publishes the latest developments in multidisciplinary areas in biology and biomedicine, with an emphasis on protein and cell research.

Impact Factor: 15.328*
SCIE Cell Biology: 18/194

A new Endocrine Society journal. *JCEM Case Reports* publishes original clinical cases covering the entire spectrum of endocrinology, worldwide.

Oxford Open Series

The **Oxford Open** series, which launched in 2020, is a new flagship open access journal series from Oxford University Press.

Titles in this series further OUP's mission to support excellence in research, scholarship, and education by providing additional high quality and fully OA venues for researchers to disseminate their work. Underpinned by principles of open research, Oxford Open will grow to include cutting edge research in a wide range of other disciplines.

The following eight titles are currently published as part of the Oxford Open series: *Oxford Open Climate Change*, *Oxford Open Digital Health*, *Oxford Open Economics*, *Oxford Open Energy*, *Oxford Open Immunology*, *Oxford Open Infrastructure and Health*, *Oxford Open Materials Science*, and *Oxford Open Neuroscience*.

Visit our website to learn more about this series and titles included in it: academic.oup.com/oxfordopenjournals

Open Access Monographs

We recognize the importance of the monograph, especially in the humanities and social sciences. Our OA monographs are published on a funded basis and aim to take a flexible and inclusive approach on a case-by-case basis. At present OUP publishes about 70 OA monographs each year.

We take an active role in discussions around the changing nature of the monograph and have participated in several studies and consortium projects. These improve our understanding of the opportunities open access publishing offers our monograph authors and help inform our own publication models.

Visit our website to find out more: global.oup.com/academic/open-access/

Oxford University Press Read & Publish

Oxford University Press offers Read and Publish agreements that allow affiliated authors to read and to publish in OUP's prestigious Journals Collection and fully OA journals. We currently have over 30 Read & Publish Agreements with institutions across many countries globally.

Oxford University Press's Read and Publish agreements allow your researchers to:

Read high-quality peer-reviewed research from OUP journals

Publish open access articles

Benefits for Institutions:

Full access to all articles within the OUP Journals Collection

Secure online dashboard and control over author requests

Detailed, live reporting on OA papers published

Benefits for Authors:

Access to high-impact research across subject areas

Easy way to publish open access with the charge included in the agreement

Routes to compliance with funder mandates

Which journals are included in Read and Publish agreements?

OUP aims to make open access publication simple for authors in the widest possible range of OUP journals. Read and Publish agreements allow affiliated authors to read and to publish in the OUP's prestigious Journals Collection and fully OA journals. Find out about OUP's current agreements at oxford.ly/rp agreements.
